

N ABIRAM SEKAR

Full Stack Developer | DevOps Engineer

abiramsekar2004@gmail.com | +91 8309381211 | [LinkedIn](#) | [Portfolio](#)

PROFESSIONAL SUMMARY

Full Stack Developer with DevOps expertise, specializing in building and deploying scalable web applications end-to-end. Proficient in Laravel, PHP, MySQL, Docker, Nginx, Linux, and AWS. Experienced in architecting CI/CD pipelines, Model Context Protocol (MCP) integrations, role-based access systems, and Agile delivery.

TECHNICAL SKILLS

Frontend:	HTML, CSS, Bootstrap, Laravel Blade, JavaScript
Backend:	PHP, Laravel, RESTful APIs, MySQL, MVC Architecture
DevOps:	Docker, Docker Compose, Nginx, Linux (Ubuntu), Bash, CI/CD pipelines
Cloud & Infra:	AWS (EC2, S3, CLI)
Tools:	Git, GitHub, Jira, VS Code, Agile/Scrum, Spec-Driven Development (SDD)

PROFESSIONAL EXPERIENCE

Junior Associate Engineer · ULTIWeb Technologies · Chennai

Nov 2025 – Present

- Designed and implemented a PoC integrating an LLM with enterprise applications via the Model Context Protocol (MCP), enabling controlled AI-driven operations over backend systems.
- Built server-side MCP components in PHP/Laravel for secure LLM-to-backend communication; deployed on AWS EC2 and on-premise Linux servers with Nginx reverse-proxy and SSL automation.
- Wrote Bash scripts to automate deployment pipelines: Nginx config, SSL provisioning via AWS S3, and AWS CLI environment bootstrap — reducing manual setup time significantly.

Technology Solution Intern · ULTIWeb Technologies · Chennai

Feb 2025 – Nov 2025

- Built a multi-tenant role-based access platform (5 user roles) using Laravel, Blade, Bootstrap, and RESTful APIs; containerized with Docker Compose (PHP-FPM, MySQL, Nginx) and deployed on Linux.
- Developed frontend for an AI document analysis platform using PHP and JavaScript; integrated AI APIs for real-time inference with dynamic dashboards and async Redis-backed processing queues.
- Developed a role-based access management platform supporting multiple user types such as Admin, MSSP, MSP, Admin User, and End User, each with distinct permissions and restrictions

KEY PROJECTS

Role-Based Access Management Platform · Laravel · PHP · MySQL · Docker · Nginx · AWS EC2

- Dev: Granular permissions for 5 user roles; dynamic UI with Blade/Bootstrap; RESTful API integration for license and access control.
- Deploy: Docker Compose stack; Nginx ; automated provisioning to AWS EC2 via Bash scripts.

AI Document Analysis Platform · Laravel · PHP · MYSQL · Python · LLM (OpenAI) · API

- Dev: Auth flows, S3 file-upload pipelines, real-time AI-response rendering with PHP + Python; async queue processing.
- Deploy: Dockerized backend served via Nginx with HTTPS on Ubuntu production server; async jobs managed with Redis queues.

EDUCATION

B.Tech – Electronics & Communication Engineering

CGPA: 7.5

Narayana Engineering College, Nellore | 2021 – 2025

CERTIFICATIONS & ACHIEVEMENTS

- Cisco: Python Programming
- Infosys: Introduction to Artificial Intelligence
- HackerRank: Python & Problem Solving
- Hackathon Participant – National Level
- Swecha AP Internship – Web Development
- National Level Mock Stocks – StockGro
