N ABIRAM SEKAR

Full Stack Developer | DevOps Engineer

abiramsekar2004@gmail.com | +91 8309381211 | LinkedIn | Portfolio

PROFESSIONAL SUMMARY

Full Stack Developer with DevOps skills and ~1.8 years of combined internship and full-time experience. Builds and deploys Laravel/PHP applications end-to-end using Docker, Nginx, Linux, and AWS. Hands-on with multi-tenant platforms, LLM integrations (OpenAI, Model Context Protocol), queue-based processing, and CI/CD.

TECHNICAL SKILLS

Frontend:	HTML, CSS, Bootstrap, Laravel Blade, JavaScript
Backend:	PHP, Laravel, Python, Flask, RESTful APIs, MVC, Redis queues
Database	MySQL, postgresql
DevOps:	Docker, Docker Compose, Nginx, Linux (Ubuntu), Bash, CI/CD, GitHub Actions
Cloud & Infra:	AWS (EC2, S3, IAM, VPC, Route 53, CloudWatch, CLI)
Tools:	Git, GitHub, Jira, VS Code, Agile/Scrum, Spec-Driven Development (SDD)
AI/LLM:	OpenAI API, Claude, Gemini, Model Context Protocol (MCP), prompt design

PROFESSIONAL EXPERIENCE

Junior Associate Engineer · ULTIWeb Technologies · Chennai — Nov 2025 – Present

- Built and maintained a multi-tenant WhatsApp AI automation platform using Laravel, MySQL, Docker Compose, Redis and LLM APIs.
- Implemented tenant-isolated application stacks, queue-based processing, delayed responses, configurable prompts and group-level access controls.
- Integrated LLM context handling for conversation history and user/group tone, with automated summaries and moderation workflows.
- Built MCP-based backend integrations and deployed services on AWS EC2 behind Nginx with SSL and automated server bootstrap scripts.
- Worked across requirements, development, testing and deployment while collaborating with clients and internal teams.

Technology Solution Intern | ULTIWeb Technologies, Chennai — Feb 2025 – Nov 2025

- Developed Laravel/PHP modules with role-based access control, REST APIs, MySQL and Docker-based local/deployment environments.
- Built frontend features and real-time dashboards for an AI document-analysis platform using PHP, JavaScript and asynchronous processing.

KEY PROJECTS

WhatsApp AI Automation Platform | Laravel, MySQL, Docker, Redis, LLM API • Designed a multi-tenant

- WhatsApp assistant with QR-based onboarding, configurable bot behavior and group-level access.
- Implemented queue-driven delayed responses, conversation summaries and automated word-detection/moderation workflows.

AI Document Analysis Platform · Laravel · PHP · MYSQL · Python · LLM (OpenAI) · API

- Dev: Auth flows, S3 file-upload pipelines, real-time AI-response rendering with PHP + Python; async queue processing.
- Deploy: Dockerized backend served via Nginx with HTTPS on Ubuntu production server; async jobs managed with Redis queues.

CloudOps Monitoring & Observability Platform · Personal Project

Python · Flask · Docker · Nginx · Prometheus · Grafana · AWS EC2 · CloudWatch · GitHub Actions

- Built production-style monitoring APIs using psutil to collect CPU, memory, disk, network, process, uptime, and API latency metrics.
- Configured Docker Compose, Nginx reverse proxy, HTTPS/SSL, domain routing, CloudWatch Logs, and IAM-based access control.
- Implemented CI/CD pipeline with GitHub Actions for automated deployment to AWS EC2.

EDUCATION

B.Tech – Electronics & Communication Engineering — CGPA: 7.1

Narayana Engineering College, Nellore — 2021 – 2025
